Perhaps I'll start with the fact that I love the games of the genre of action.

The game welcomes you with interesting music and a pleasant level of pumping your ship.

There are also many skills and a variety of different weapons.

I liked the game, I recommend it!. I don't get anything from this game. How does it play? Why does it show different controls ingame when I remapped them before? I can only move left and right, how the hell am I supposed to get up?

Controller didn't work btw, partial controller support is a lie.

Main menu is unbelievable already, and you still haven't gotten started yet.

Not even worth to farm cards. Very cute skin and I love the artwork! However I personally prefer the more badass skin which is Gnabot.

However if you cannot afford that skin or want to keep Gnaw's cuteness, this skin is a must have!. Where do I begin with this?

1. The graphics are horrendous and look like 90's CGI. I bought this in 2016 and the graphics are easily beaten by every other card game here on Steam.
2. The price is way too high as I payed \$4.99 for it on sale and it was way too much. If this were .99 then I wouldn't be writing this but due to the fact they have the nerve to charge \$9.99 for this is unreal
3. The game is a lazy port of the mobile game. Spinning the crystal is proof in that of itself
4. The game is buggy and gives no real understanding of the game as they would rather flashback to the 2 characters staring at each other and grunting during the battle.

The only positive I have for this is the fact that they tried to make something new instead of being a Hearthstone or MTG clone. Good on you guys for that!

If you all can fix those 4 things than I will remove my negative review and make it positive. this has got to be my favorite game when im bored, especially with the new update. Considering the age of the game: This game is just AMAZING. The atmosphere is dense, graphics still ok and sound is fantastic. Even compared with some just recently released games of same type this game is still great. I bought this game on sale for about 1 EUR. I guess I never in my life got so much fun after spending same amount of money.. a nice relaxing game. i like it. nice music. i liek the eat sound lol and i just like the music. 9.5/10. Fun, quick, simple. Some of the one liners made me chuckle a bit. Light hearted humor the whole way through. Game really reminds me of Bejeweled - In fact it is Bejeweled Twist with the RPG Elements of Square Enix. Its very challenging but you have to go through the tutorial to really understand it , because if you write off this Bejeweled Themed game as a puzzle game with a visual skin slapped on it, you will not win at this game.

There have been people who have not been able to run this game. It has to do with people who don't have very high resolution monitors or their monitor can't support certain resolutions. I've posted a workaround in the forum for this that should work for everyone but it will result in a 640x480 resolution.

This is technically an "early access" review, because I got to try this game before it came out when I went to an arcade/pinball/retro gaming convention, right off the bat I talked about how I felt like I was in the 80's when I tried the game on an actual cartridge.

The game's ost is interesting and definitely gives off that catchy/classic retro kind of creepy feel that you'd expect from horror style games during the NES era and the art style reminds me strongly of Double Dragon and River City Ransom on the NES, but the question remains, is this game a good game?

The game is an interesting game and definitely lives up to "Nintendo hard" in terms of how tough old school games were, with basic gameplay (go to the right, just like a beat em up) but with platforming elements and difficult placements similar to Mega Man

However, where the game's problems are can be "located" if you will, with no ability to use passwords if you run out of continues or a file to save (although the game may be trying this to capture NES nostalgia, it can feel like a chore if you're required to play throughout the game in one run, especially with no way of getting back to where you were if you run out of continues) and some of the bosses (to my knowledge) take no effort to beat, for example you fight bigfoot on level 2, all I had to do after losing 1 life was stand on a tree stump without moving and beat that boss fight easy

Overall, the game is a nice game and definitely feels like an old NES game and it's nice to know that new games are being made these days for old consoles, however, I feel as though (unless this game gets patched) that due to it trying to hard to "match" the NES, it might actually turn off some people from trying the game, I would get the game if it's at a discount or on a physical cartridge, but be ready for a challenge and be aware that the game can be slightly unfair. TL;DR: Playing this game like fighting up a hill while blindfolded, then losing to the actual toaster at the top because your sergeant took away your rifle in the middle of battle and someone gave the toaster a nuclear weapon instead of bread. Don't waste your money on this game, not even on sale.

I hate this game. Every sector you have to start over from square one. The whole of humanity has chronic amnesia because all research you've done is immediately forgotten upon finishing a fight. The whole map is covered in fog of war keeping you from knowing where each of the capture points is, the AI on the other hand gets to beeline to each and every capture point on the map. Infact, that is the extent of what the AI is capable of, and will beat you, not because of brilliant strategy, but because it is given so many resources it can get nearly double the upgrades you can. Calling this game a strategy game is an insult to the genre.. We played a few hours last night and we were very impressed. Controls scheme could use some work (like using trigger to put gun away while also firing lead to a few miss fires... :P) but that's early access. Over all I was way more impressed than I was expecting. Can't wait to see where this goes :). A short, simple game that should entertain you for a few hours. It doesn't claim to be more than that and it doesn't pretend to be more than that. It's all a game of it's type needs to be and it delivers. It doesn't have bugs, doesn't crash, doesn't try sell you other crap, and it's fun to play. Perhaps this would be unjustified if it was expensive but it's dirt cheap, so if you're looking to expand your indie collection and kill a few hours in the process, this ain't a bad choice.. Bagus juga , yang permainan Hard lumayan susah.. Excellent add-ons which make the main game even more fun, well worth it, thumbs up!. As a Junk Jack IOS veteran and supporter, I think Junk Jack on PC is amazing and here's why!

- better movement (can jump around)
- Shading is great
- Gameplay is smooth
- There's only certain things on pc that are not on mobile
- music is nice and relaxing
- and much much more!

I rate this game a solid 10/10 But it will get better in the future.. This was my first full playthrough of a real Hitman like game, granted it was on Easy. But I feel this game is a fantastic introduction to Hitman type games and it's WWII based. A fantastic mix, the hints and other aids provided (on Easy) make Death to Spies worth it, even if you haven't played Hitman games before, who knows maybe after beating this game you will?. I have played the original Heroes of Might and Magic, Heroes of Might & Magic 3: The Shadow of Death, and even a bit of the newer Heroes of Might and Magic VI, and I have to say this is by far my favorite one so far. Heroes of Might and Magic V was a great game, and this only adds on to it in many ways. Some of the major additions is the two types of each tier of soldiers that you can recruit, and of course adding an additional faction, the

Orcs, while not losing many of the great features in Heroes V that were lost in the Hammers of Fate Expansion. Still a very challenging game overall, but well done. Definitely recomend it, especially if you liked the original Heroes V.
